Adjustable

- Low: 152 cm
- High: 175 cm

vs.

Non adjustable

- 160 cm

Option

Inclusive Navigation Made Simple

Make your kiosk inclusive, compliant, and user-friendly with AudioNav EF.

(Software customization required)

Option

Assistive Technology

Available with Assistive Technology, allowing the stand to be used by everyone – including the visually impaired.

Adjustable volume and speech speed ensure a comfortable experience, while support for headsets and handsets enables clear voice interaction. It also includes a Bluetooth Low Energy module which facilitates a one-to-one connection with the user's personal

smartphone or tablet device via the Storm Touchless-CX app. AudioNav EF gives all users the freedom to navigate self-service kiosks with ease.

Through spoken guidance and a tactile keypad, customers with visual, motor or reading difficulties can confidently explore menus and make selections.

Payment Module - Seamless Self-Service Transactions

With an integrated payment module, your kiosk becomes a fully self-sufficient solution, enabling fast, secure, and effortless transactions without staff assistance and empowering your customers to complete purchases independently.

Reduce queues, save resources, and deliver a smooth, professional customer experience every time.
